Customised IT Training & Development

Testimonials

British Gas Business

Cleary Training Associates have always been able to add to our portfolio of courses we already run in house. Nothing has ever been any trouble for them. We have a great working relationship from a course being booked and arranging for courses to either be tailored to suit our needs, or even bespoke. The trainers are very professional and knowledgeable and provide an after service which also includes how the course went with full evaluation.

Christy UK Ltd

We have always been delighted with the training Cleary Training Associates have provided to Christy for both IT & Personal Development training. Our working relationship started a number of years ago and we have returned to them on numerous occasions due to their professionalism in responding to our needs, tailoring solutions to meet our exact requirements, their follow-up training evaluation and of course the technical ability of their trainers.

Umbro International

UMBRO International has used Cleary Training Associates to undertake end user training (Microsoft Office) for the last 3 years ranging from basic introduction to advanced sessions. We have always found the trainers to be extremely knowledgeable about the products, they understand our culture and always deliver the sessions in an efficient and effective manner.

Manchester United Ltd

We have worked with Cleary Training Associates since they set up and have found their service to be professional, prompt and tailored to meet our every need. They have carried out training needs analysis, rolled out a training programme for approx 250 staff, evaluated their training needs and supported our staff with one to one service either personally or over the phone. With such great service delivered on site to meet our needs we wouldn't hesitate in recommending them.

Interserve Projects

Tracy and her team at Cleary Training Associates have always provided me with outstanding IT training and support. Whatever the problem CTA are always there with the solution. All their trainers are of the highest calibre and will adapt to suit the client's needs.
