Customised IT Training & Development

Testimonials

BOC UK Financial Services Centre

The primary role of the BOC UK Financial Services Centre is to deliver high quality information and financial services in partnership with it's customers. We aim to achieve this by implementing strategies that are focused on continuous improvement, developing our teams, and the use of leading edge technology, tools and techniques.

There are so many training providers out there these days, it can be difficult to choose between them! What's great about CTA is their friendly, flexible approach and their ability to really understand their customers. When we've needed something a little more bespoke, Tracy has reacted swiftly and popped over to see us to discuss our requirements in more detail. The resulting customised courses turned out to be a great success, with comments like:-

"this was the most interesting course I've ever been on"

"it was great to have the opportunity to change the focus of the material, so that we could concentrate on what we felt was important to us"

"the course was relative to real work situations, and had an informal and relaxed pace"

CTA have always delivered excellent, effective and most importantly, enjoyable training to our teams and we look forward to many more training days in the future!

Tarmac Central

Cleary Training Associates have provided us with a consistently excellent IT training service, adapting to our individuals' need and creating bespoke courses as requested. The glowing feedback from our delegates has convinced us to look no further for IT training!
